Joshua Project: Bringing Definition to the Great Commission
by Dan Scribner, Director Joshua Project

It has been said that a problem well-defined is a problem half-solved. At the 1974 Lausanne Conference, Ralph Winter began to define the Great Commission problem that many of the world’s ethnic people groups remained hidden or unreached with the gospel of Jesus Christ. For the Church to fulfill the Great Commission there needed to be a well-defined target.

During the early years of the U.S. Center for World Mission, Dr. Winter was wisely hesitant to promote a specific people group list. Rounded guestimates were used when referring to people group counts. With the dramatic changes in technology, interconnectivity and data gathering capabilities, that reality has changed. Joshua Project seeks to fill that need for a specific, accurate and comprehensive people group list to support Dr. Winter’s 1974 Lausanne focus. Joshua Project exists to answer the following questions:

• Who are the ethnic people groups of the world?
• Which people groups are still considered least-reached and in need of a Church-Planting Movement in their midst?
• What ministry resources are available to help outreach among the least-reached?

Joshua Project focuses on catalyzing pioneer evangelism and church planting, identifying those people groups with few Christian believers and with little history of exposure or response to the gospel message.

Since 1995 Joshua Project has compiled and refined a list of the world’s ethnic people groups. The list has been reviewed, critiqued and updated by hundreds of on-site workers, national researchers, denominational leaders and mission strategists. Today this database lists 16,700 distinct people groups of which approximately 7,000 are considered unreached, meaning they have very few disciples of Jesus. Over 40% of the world’s population lives in these 7,000 unreached groups. In other words, four out of ten people in the world today live in a people group that has very limited, if any, exposure to the gospel.

As the U.S. Center for World Mission transitions to Frontier Ventures, the Lord has positioned Joshua Project well in this Internet and mobile age. All Joshua Project information is in electronic form, easily downloadable and without cost to those who use it. Thousands of visitors each day interact with unreached people statistics, profiles, photos, maps and more through the Joshua Project website (www.joshuaproject.net). Dozens of downloads per day are occurring of Joshua Project raw data files, which is an indication that people are interested in and are finding uses for unreached peoples information. All Joshua Project data uses standard coding which allows easy integration with other missions datasets.
No previous generation has had the clarity, resources and manpower that exist in the global missions movement today.

One example of Joshua Project information being used to catalyze church planting among unreached people groups involves the ministry of ANM, Advancing Native Missions. Workers in a particular country are called together for a conference and given the Joshua Project list of unreached people groups in that country. Individuals are challenged to commit to outreach among one or more specific people groups. This systematic approach lessens the likelihood of people groups falling through the cracks. Other indigenous focused ministries such as Asia Harvest ministry also use Joshua Project data in a similar fashion. Asia Harvest helps facilitate the work of more than 1,000 indigenous evangelists and church planters many of whom are serving among unreached people groups.

Another example of Joshua Project data being used involves MANI, Movement for African National Initiatives. This continent-wide network of indigenous agencies, churches, and workers has made a copy of the Joshua Project list of people groups for Africa. They reviewed the data country-by-country and are using it for their outreach strategies.

Joshua Project seeks to adapt and serve as we look forward to the future and see realities such as:

- The peoples of the world are in motion, migrating and scattering to different countries.
- Mobile phones have become ubiquitous, widely used even in the developing world. Increasingly, these mobile devices can connect to the Internet, present ministry resources in various formats and even gather information.
- The gospel message is rapidly becoming available in electronic form in the majority of the world's languages. This availability coupled with widespread Internet access means the gospel can readily flow to people groups that have been cut off from access in the past.
- Indigenous Christian workers are increasingly carrying the load insofar as reaching the people groups in their own countries.
- The people group focus continues to be pertinent to world evangelization and this is being increasingly recognized.

No previous generation has had the clarity, resources and manpower that exist in the global missions movement today. The “problem” of the Great Commission is becoming increasingly well-defined through many missions research efforts. Joshua Project is eager to serve Frontier Ventures and the world-wide missions movement in the days ahead.
